LIST OF CONTENTS

NUMBER 1

Publisher's Note iii

V. K. S. ONG, J. C. H. PHANG and D. S. H. CHAN: A direct and accurate method for the extraction of diffusion length and surface recombination velocity from an EBIC line scan 1

KATSUHIRO YOKOTA, MASANORI SAKAGUCHI, HIROKI INOHARA, HIROMI NAKANISHI, SUSUMU TAMURA, YUUJI HORINO, AKIYOSHI CHAYAHARA, MAMORU SATHO, KIYOHITO HIRAI, HIROMICHI TAKANO and MASHAO KUMAGAYA: Dependence of the activity efficiency of Mg-implanted into GaAs on the concentration of As doped into a-Si:H encapsulants 9

MING-DOU KER and CHUNG-YU WU: CMOS on-chip electrostatic discharge protection circuit using four-SCR structures with low ESD-trigger voltage 17

ALI ABOU-ELNOUR and KLAUS SCHUENEMANN: An efficient and accurate self-consistent calculation of electronic states in modulation doped heterostructures 27

MINGZHEN XU, CHANGHUA TAN, YANDONG HE and YANGYUAN WANG: A spectral analysis method to directly determine minority carrier generation lifetime using the pulsed MOS structure 31

A. G. MILNES, M. YE and M. STAM: Ohmic contacts of Au and Ag to p-GaSb 37

SIK ON KONG and CHEE YEE KWOK: Fowler–Nordheim tunnelling current in an $Mg/SiO_2/Si$ MOS structure 45

KUO-WEI LIU and A. F. M. ANWAR: A self-consistent calculation of the small signal parameters for AlGaAs/GaAs and AlGaAs/InGaAs/GaAs HEMTs 51

NICLAS KESKITALO and ANDERS HALLÉN: Resistivity profile measurements of proton-irradiated n-type silicon 55

STEPHEN A. WONG, SEAN P. MCALISTER and ZHAN-MING LI: A comparison of some approximations for the Fermi–Dirac integral of order 1/2 61

WEN-CHUN WANG, TZONG-SHENG CHANG and FON-SHAN HUANG: Study of tantalum-based diffusion barriers between Al and Si 65

G. ASHKINAZI, B. MEYLER, M. NATHAN, L. ZOLOTAREVSKI and O. ZOLOTAREVSKI: Temperature dependence of forward current–voltage characteristics in a GaAs *PiN* structure with near-fully compensated i-region under low and high injection conditions 71

Y. PAN, K. K. NG and V. KWONG: Comparison of gate-edge effects on the hot-carrier induced degradation of LDD N- and P-channel MOSFETs 77

SALVATORE BELLONE and GIOVANNELLA LIRER: Analytical model of the effective recombination velocity of diffused p–p^+ (n–n^+) high–low junctions at arbitrary injection level 83

KUN-ZEN CHANG and CHING-YUAN WU: Novel characteristics of the polysilicon high–low-emitter (PHL-emitter) bipolar transistor—high current gain and zero activation energy 93

CHENG-LIANG HUANG and NARAIN D. ARORA: Characterization and modeling of the n- and p-channel MOSFETs inversion-layer mobility in the range 25–125°C 97

Q. CHEN, N. ZOU and M. WILLANDER: Charge-control and mobility in Si delta-doped FETs grown by MBE 105

A. EMRANI, G. GHIBAUDO and F. BALESTRA: On the universal electric field dependence of the electron and hole effective mobility in MOS inversion layers 111

L. FONSECA and F. CAMPABADAL: Effect of RTP/furnace processing on the minority carrier lifetime in very thin oxide MOS capacitors 115

D. ROSENFELD and S. A. ALTEROVITZ: The effect of strain on the base resistance and transmit time of ungraded and compositional-graded SiGe HBTs 119

P. HAZDRA and J. VOBECKÝ: Accurate simulation of fast ion irradiated power devices 127

Z. GRIBNIKOV and A. ROTHWARF: A new intermediate state model for the GTO: relation to the turn-off process 135

S. W. LAVELLE: Analytic expressions for the field dependent tunnelling attenuation factor in thin insulators 141

A. REKLAITIS and G. MYKOLAITIS: Current switching and instability in a heterostructure hot electron diode 147

DEREK KIMPTON and JOHN KERR: A simple trap–detrap model for accurate prediction of radiation induced threshold voltage shifts in radiation tolerant oxides for all static or time variant oxide fields 153

H. SEHIL, H. LHERMITE, F. RAOULT and Y. COLIN: Effect of thickness and granular structure on the electrical conductivity of the active layer in polycrystalline silicon TFTs 159

V. KROZER and A. GRÜB: A novel fabrication process and analytical model for Pt/GaAs Schottky barrier mixer diodes 169

Notes

MICHAEL A. STROSCIO and K. W. KIM: Generalized piezoelectric scattering rate for electrons in a two-dimensional electron gas 181

J. J. LIOU, C. S. HO and A. KAGER: Determination of the fitting parameters for using uniform emitter and base doping profile in bipolar transistor modeling 183

TAE-HUN MOON, YEARN-IK CHOI and SANG-KOO CHUNG: Calculation of avalanche breakdown voltage of the InP P^+–N junction 187

SIK ON KONG and CHEE YEE KWOK: Fowler–Nordheim tunnelling current in a yttrium/silicon dioxide/silicon MOS structure 189

S. MUKHOPADHYAY and A. N. DAW: On the dependence of cut-off frequency of a Schottky diode on epilayer doping 192

T. SKRABKA: Properties of Au–Ge ohmic contacts after the alloying process 195

SHI-HO KIM, KYEONG-SIK MIN and KWYRO LEE: A new experimental method (E-plot) to characterize the substrate-current and the saturation-voltage of fresh and hot-electron-damaged NMOSFETs 198

A. OUACHA, M. WILLANDER, B. HAMMARLUND and R. A. LOGAN: Collector–emitter offset voltage in InP/InGaAs single and double heterojunction bipolar transistors 201

J. B. KUO and J. H. SIM: Subthreshold characteristics of a SiGe-channel PMOS device operating at 77 K 204

Y. J. LEE, C. T. KIM, S. C. HONG and Y. S. KWON: Transconductance compression near subthreshold of GaAs floated electron channel field effect transistor 207

V. PANKRATOV and V. RYZHII: Monte-Carlo simulation of gate leakage current effect in p-channel GaAs/$Al_{0.7}Ga_{0.3}As$ HIGFET 211

G. KHRENOV, V. RYZHII and S. KARTASHOV: AlGaAs/GaAs HBT collector optimization for high frequency performance 213

M. PEJOVIĆ, S. GOLUBOVIĆ, G.RISTIĆ and M. ODALOVIĆ: Annealing of gamma-irradiated Al-gate NMOS transistors 215

ROLAND SORGE: The double sweep HF-CV technique for generation lifetime determination in MOS capacitors 217

P. NUBILE and N. VEISSID: A contribution to the optimization of front-contact grid patterns for solar cells 220

NUMBER 2

Publisher's Note iii

DER-FENG GUO, SHIUH-REN YIH, JING-TONG LIANG and WEN-CHAU LIU: Characteristics of a GaAs metal-n^+-ν-δ (p^+)-ν-n^+ switch 223

K. Y. HUR, W. J. SCHAFF, L. F. EASTMAN and R. C. COMPTON: A MODFET process for micrometer scale strained layer islands 231

Y. H. WANG, M. P. HOUNG, C. H. CHU and H. H. CHEN: Self-consistent simulation of modulation-doped field-effect transistors 237

S. P. WILSON: Modification of the lucky drift theory of impact ionisation for investigation of soft thresholds 243

T. SMEDES and F. M. KLAASSEN: Influence of channel series resistances on dynamic MOSFET behaviour 251

MING-DOU KER and CHUNG-YU WU: Transient analysis of submicron CMOS latchup with a physical criterion 255

L. FRATELLI and G. F. VITALE: On the reverse bias safe operating area of power bipolar transistors during inductive turn-off 275

J. P. COLINGE, D. FLANDRE and F. VAN DE WIELE: Subthreshold slope of long-channel, accumulation-mode p-channel SOI MOSFETs 289

SHENG-LYANG JANG and PING-CHEN CHANG: Degradation of *npn* bipolar junction transistors under dynamic high current stress 295

PING-CHEN CHANG, SHENG-LYANG JANG and YOUNG-SHYING CHEN: Degradation of bipolar junction transistors under dynamic high current stress and biased in open-collector condition 303

SHENG-LYANG JANG: Analytical study of collector–base capacitance and cutoff frequency of n^+–p–n–n^+ bipolar junction transistors 311

V. S. VEERASAMY, G. A. J. AMARATUNGA, C. A. DAVIS, W. I. MILNE, P. HEWITT and M. WEILER: Electronic density of states in highly tetrahedral amorphous carbon 319

KUNIHIRO SUZUKI, TETSU TANAKA, YOSHIHARU TOSAKA, HIROSHI HORIE, YOSHIHIRO ARIMOTO and TAKASHI ITOH: Analytical surface potential expression for thin-film double-gate SOI MOSFETs 327

M. KLINGENSTEIN, J. KUHL, J. ROSENZWEIG, C. MOGLESTUE, A. HÜLSMANN, JO. SCHNEIDER and K. KÖHLER: Photocurrent gain mechanisms in metal–semiconductor–metal photodetectors 333

H. F. F. JOS: Collector model describing bipolar transistor distortion at low voltages and high currents 341

YUNG-SONG LOU and CHING-YUAN WU: A characterization technique for the degradation characteristics of Ti/Si Schottky-barrier diodes and ohmic contacts after thermal silicidation 353

QI LIN, NEIL GOLDSMAN and GWO-CHUNG TAI: Highly stable and routinely convergent 2-dimensional hydrodynamic device simulation 359

C. D. KOURKOUTAS and G. J. PAPAIOANNOU: A fast solution of Poisson's equation in FETs 373

Notes

SUBHASIS HALDAR, MANOJ KUMAR KHANNA, MANEESHA, RACHNA SOOD, MANJU, VANEETA AGGARWAL and R. S. GUPTA: Threshold voltage shift in depletion mode insulated gate field effect transistors 377

H. S. HUANG, C. Y. CHANG, CHEN-CHUNG HSU, K. L. CHEN and J. K. LIN: Analysis of bilateral latch up triggering in VLSI circuits 380

D. SANDS and K. M. BRUNSON: Rapid analysis of conductance data in metal–oxide–semiconductor measurements using an approximate method 383

NUMBER 3

Publisher's Note iii

S. LIANG, C. A. T. SALAMA and M. MALIEPAARD: Modeling the d.c. characteristics of merged bipolar-MOS structures 387

GEERT VAN DEN BOSCH, GUIDO GROESENEKEN and HERMAN E. MAES: Critical analysis of the substrate hot-hole injection technique 393

SHIN-ICHI TANAKA and M. S. LUNDSTROM: A compact HBT device model based on a one-flux treatment of carrier transport 401

M. J. VAN DORT, P. H. WOERLEE and A. J. WALKER: A simple model for quantisation effects in heavily-doped silicon MOSFETs at inversion conditions 411

S. S. ANG, Y. J. SHI and W. D. BROWN: A comparison of square, triangular, and sinusoidal waveforms used for avalanche electron injection in MOS structures 415

LIFENG LIU, G. S. LEE and A. H. MARSHAK: Band discontinuities of Si/Ge heterostructures 421

W. HARTH, W. BOGNER, L. GAUL and M. CLAASSEN: A comparative study on the noise measure of millimetre-wave GaAs Impatt diodes 427

M. DEPAS, R. L. VAN MEIRHAEGHE, W. H. LAFLÈRE and F. CARDON: Electrical characteristics of Al/SiO_2/n-Si tunnel diodes with an oxide layer grown by rapid thermal oxidation 433

K. RADERMACHER, A. SCHÜPPEN and S. MANTL: Electron transport of inhomogeneous α-$FeSi_2$/(111)Si Schottky barriers 443

F. BLANCO: New techniques to measure parasitic resistances in Schottky-gate FETs ... 451

J. H. SIM, M. C. TANG and J. B. KUO: A fully analytical back-gate bias model for n-channel silicon MESFETs with back channel implant 459

J. H. SIM and J. B. KUO: An analytical delayed-turn-on model for accumulation-type ultra-thin SOI PMOS devices operating at 77 K 463

JOHN STARR HAMEL: Non-quasi-static modeling of neutral region a.c. photo currents in integrated photodiode detectors 473

B. L. YANG, H. WONG and Y. C. CHENG: Study of process-dependent electron-trapping characteristics of thin nitrided oxides 481

KUNIHIRO SUZUKI: Analytical base transit time model for high-injection regions 487

C. PAPADAS, G. GHIBAUDO, F. PIO, C. MONSÉRIE, G. PANANAKAKIS, P. MORTINI and C. RIVA: On the charge build-up mechanisms in gate dielectrics 495

FLORIN UDREA, GEHAN A. J. AMARATUNGA and QIN HUANG: The effect of the hole current on the channel inversion in Trench Insulated Gate Bipolar Transistors (TIGBT) 507

Notes

V. SZÉKELY: Comments on "Selfheating effects in silicon resistors operated at cryogenic ambient temperatures" 515

SUNG-IHL KIM, BYUNG R. RYUM, SANG-WON KANG and WONCHAN KIM: The effect of a parasitic potential barrier on the neutral base recombination current of Si/SiGe/Si DHBTs 517

P. C. SRIVASTAVA, C. COLLUZA, S. CHANDRA and U. P. SINGH: Al/n-Si diodes with low energy ($\sim$100 eV) hydrogen ion implantation prior to metallization 520

NUMBERS 4–6

PROCEEDINGS OF THE SIXTH INTERNATIONAL CONFERENCE ON MODULATED SEMICONDUCTOR STRUCTURES

Preface xvii
Organising Committee, Program Committee, Advisory Commitee and Sponsors xix

GROWTH OF WIRES AND DOTS

YASUHIKO ARAKAWA: Fabrication of quantum wires and dots by MOCVD selective growth 523

J. BLOCH, U. BOCKELMANN and F. LARUELLE: Polarization spectroscopy of modulated GaAs/GaAlAs quantum wells grown on vicinal surfaces: anisotropic islands or ordered growth? 529

K. EBERL, A. KURTENBACH, P. GRAMBOW, A. LEHMANN, K.v. KLITZING, D. HEITMANN, M. DILGER and M. HOHENSTEIN: Preparation of low dimensional structures by molecular beam epitaxy-regrowth on patterned AlGaAs buffer layers 535

N. USAMI, T. MINE, S. FUKATSU and Y. SHIRAKI: Fabrication of SiGe/Si quantum wire structures on a V-groove patterned Si substrate by gas-source Si molecular beam epitaxy 539

TRANSPORT PROPERTIES IN LOW-DIMENSIONAL SYSTEMS

B. BRILL, M. HEIBLUM and HADAS SHTRIKMAN: Electron heating in doped GaAs—is it directional? 543

W. WEGSCHEIDER, W. KANG, L. N. PFEIFFER, K. W. WEST, H. L. STORMER and K. W. BALDWIN: High-mobility transport along single quasi-1D quantum wires formed by cleaved edge overgrowth 547

L. W. MOLENKAMP and M. J. M. DE JONG: Observation of Knudsen and Gurzhi transport regimes in a two-dimensional wire 551

KANJI YOH, AKIRA NISHIDA and MASATAKA INOUE: Quantized conductance and its effects on non-linear current–voltage characteristics at 80 K in mesa-etched InAs/AlGaSb quantum wires with split-gate 555

AXEL LORKE and PIERRE M. PETROFF: Transport properties of lateral superlattices grown on vicinal GaAs (100) surfaces 559

GROWTH, CHARACTERISATION, TRANSPORT
(Poster Session)

M. LÓPEZ, T. ISHIKAWA, I. MATSUYAMA, N. TANAKA and Y. NOMURA: MBE fabrication of GaAs quantum wire structures on mesa stripes along the [001] direction 563

C. GUASCH, F. VOILLOT, M. GOIRAN, J. P. PEYRADE, E. BEDEL, C. FONTAINE, H. ATMANI and A. ROCHER: Alternate method to produce quantum wires using dislocation slipping.... 567

Y. NAKAMURA, M. TSUCHIYA, J. MOTOHISA, H. NOGE, S. KOSHIBA and H. SAKAKI: Formation of *N*-AlGaAs/GaAs edge quantum wire on (111)B micro facet by MBE and magnetic depopulation of quasi-one-dimensional electron gas 571

T. Utzmeier, T. Schlösser, K. Ensslin, J. P. Kotthaus, C. R. Bolognesi, C. Nguyen and H. Kroemer: Lateral potential modulation in InAs/AlSb quantum wells by wet etching 575

Y. Nagamune, M. Nishioka, S. Tsukamoto and Y. Arakawa: Optical properties of GaAs quantum dots fabricated by MOCVD selective growth 579

P. M. Campbell, E. S. Snow and P. J. McMarr: Fabrication of nanometer-scale conducting silicon wires with a scanning tunneling microscope 583

G. Schmidt, W. Langheinrich and K. Heime: Selective growth of SiGe nanostructures by low pressure VPE 587

D. Bertram, B. Spill, W. Stolz and E. O. Göbel: Direct epitaxial growth of (AlGa)As/GaAs quantum wires by orientation-dependent metalorganic vapour phase epitaxy 591

S. Shimomura, K. Inoue, M. Tanaka, N. Tomita, A. Adachi, M. Fujii, T. Yamamoto, T. Watanabe, N. Sano, K. Murase and S. Hiyamizu: Optical properties of $GaAs/Al_{0.3}Ga_{0.7}As$ T-shaped quantum well structure fabricated by glancing angle molecular beam epitaxy on GaAs (100) patterned substrates 597

Kenji Shiraishi, Tomonori Ito and Takahisa Ohno: Coverage dependence of migration potential of cation adatoms on GaAs(001)–(2 × 4) surface 601

M. Ramsteiner, J. Wagner, G. Jungk, D. Behr, L. Däweritz and R. Hey: Raman scattering investigation on the ordered incorporation of Si dopant atoms on GaAs (001) vicinal surfaces during MBE growth 605

T. Ruf, V. I. Belitsky, J. Spitzer, V. F. Sapega, M. Cardona and K. Ploog: Disorder-induced Raman scattering of folded phonons in quantum wells and superlattices 609

Yu. A. Pusep, A. H. Milekhin and A. I. Toropov: FTIR spectroscopy of longitudinal confined phonons and plasmon–phonon vibrational modes in $GaAs_n/AlAs_m$ superlattices 613

V. P. Gnezdilov, D. J. Lockwood and J. B. Webb: Raman scattering study of longitudinal acoustic and optic phonons in $InSb/In_{1-x}Al_xSb$ strained-layer superlattices 617

S. de Gironcoli and E. Molinari: Optical phonon probes of the lateral scale of interface roughness: a theoretical investigation 621

G. Scamarcio, C. Gadaleta, A. Tagliente, L. Tapfer, K. Ploog, Y. Ohmori and H. Okamoto: Infrared reflectivity of strained GaSb/AlSb superlattices 625

E. Koppensteiner, P. Hamberger, G. Bauer, V. Holy, H. Kibbel, H. Presting and E. Kasper: Quantitative analysis of strain relaxation and mosaicity in short period Si_mGe_n superlattices using reciprocal space mapping by X-ray diffraction 629

E. Lugagne-Delpon, J. P. André and P. Voisin: Evidence of non-commutativity of band discontinuities in InP–Al(In)As–Ga(In)As heterostructures 635

M. Capizzi, A. Polimeni, A. Frova, F. Martelli, K. B. Ozanyan, T. Worren, M. R. Bruni and M. G. Simeone: Above barrier exciton confinement in InGaAs/GaAs multiple-quantum-well structures 641

T. A. Fisher, R. A. Hogg, A. R. K. Willcox, D. M. Whittaker, M. S. Skolnick, D. J. Mowbray, J. P. R. David, A. S. Pabla, G. J. Rees, R. Grey, J. L. Sanchez-Rojas, J. Woodhead, G. Hill, M. A. Pate and P. N. Robson: Spectroscopic study of piezoelectric field effects in InGaAs/GaAs multi-quantum wells grown on (111)B oriented GaAs substrates 645

Akio Morii, Toshiya Takano, Jun Kitamura, Kazuhiko Hara, Hiroshi Kukimoto, Junji Yoshino and Takashi Yasuda: Optical properties of AlP–GaP short-period superlattices 649

A. A. Bernussi, M. J. S. P. Brasil, J. A. Brum, M. A. Cotta, R. A. Hamm, T. W. Staley, S. N. G. Chu, L. R. Harriott, M. B. Panish and H. Temkin: InGaAs/InP quantum wells with periodic thickness variation 653

V. L. Alperovich, A. S. Jaroshevich, H. E. Scheibler and A. S. Terekhov: Determination of built-in electric fields in delta-doped GaAs structures by phase-sensitive photoreflectance 657

U. Ekenberg and D. Richards: Advantages of a piezoelectric field in a quantum well 661

E. Litwin-Staszewska, F. Kobbi, M. Kamal-Saadi, D. Dur, C. Skierbiszewski, H. Sibari, K. Zekentes, V. Mosser, A. Raymond, W. Knap and J. L. Robert: Determination of the basic parameters of pseudomorphic GaInAs quantum wells by means of simultaneous transport and optical investigations 665

P. Omling, B. Kowalski, B. K. Meyer, D. M. Hofmann, C. Wetzel, V. Härle and F. Scholz: The conduction band spin splitting in type-I strained and unstrained (GaIn)As/InP quantum wells 669

Y. H. Chang, J. J. Yeh, Y. M. Sheu, C. C. Wang, T. C. Chen, K. H. Chang and C. P. Lee: Binding energies of D^- ion in GaAs quantum well 673

T. Suski, P. Wiśniewski, L.H. Dmowski, I. Gorczyca, J. Smoliner, E. Gornik, G. Böhm and G. Weimann: Correlations of the remote impurity charges—a method of 2DEG mobility tuning in GaAs/AlGaAs heterostructures 677

Rolf R. Gerhardts: Three-dimensional Boltzmann–Bloch theory of miniband transport in superlattices with elastic scattering 681

R. Döttling and E. Schöll: Domain formation in modulation-doped $GaAs/Al_xGa_{1-x}As$ heterostructures 685

R. Knott, W. Dietsche, K. v. Klitzing, K. Eberl and K. Ploog: Inside a 2D electron system: images of potential and dissipation 689

N. G. Asmar, A. G. Markelz, E. G. Gwinn, P. F. Hopkins and A. C. Gossard: D.c. transport in intense, in-plane terahertz electric fields in $Al_xGa_{1-x}As$ heterostructures at 300 K 693

J. F. Palmier, J. C. Harmand, C. Minot, H. Le Person, E. Dutisseuil, H. Wang and G. Leroux: Microwave miniband NDC in GaInAs/AlInAs superlattices 697

D. K. de Vries, K. Ploog and A. D. Wieck: Quasi-one-dimensional ballistic electron transport in in-plane-gated channels at liquid nitrogen temperature 701

M. YAMAMOTO, S. NAKATA, K. AIHARA and T. MIZUTANI: The dependence of boundary scattering in split-gate quantum wires on the transverse mode number 705

J. P. BIRD, K. ISHIBASHI, Y. AOYAGI and T. SUGANO: Experimental studies of electronic transport in semiconductor quantum dot structures 709

A. A. BYKOV, Z. D. KVON, L. V. LITVIN, JU. V. NASTAUSHEV, V. G. MANSUROV, V. P. MIGAL and S. P. MOSCHENKO: Photovoltaic effect in quasiballistic electron interferometer 713

P. E. SELBMANN and M. SUHRKE: Dimensional transition of weak localization effects in lateral surface superlattices 717

T. S. TURNER, P. M. MARTIN, L. EAVES, H. B. EVANS, P. A. HARRISON, M. HENINI, O. H. HUGHES, D. M. WHITTAKER, P. D. BUCKLE, T. A. FISHER, M. S. SKOLNICK and G. HILL: Luminescence studies of resonant tunneling in a triple barrier structure with strongly coupled quantum wells 721

V. D. KULAKOVSKII, L. V. BUTOV, I. E. ITSKEVICH, L. V. KULIK, T. G. ANDERSSON, W. SHUMIN and A. V. LOMSADZE: Correlation effects in magnetoluminescence spectra from dense quasi-2D electron gas in selectively doped InGaAs/GaAs quantum wells 725

GROWTH, CHARACTERISATION AND PHONONS

S. KOSHIBA, H. NOGE, H. ICHINOSE, H. AKIYAMA, Y. NAKAMURA, T. INOSHITA, T. SOMEYA, K. WADA, A. SHIMIZU and H. SAKAKI: MBE growth of GaAs nanometer-scale ridge quantum wire structures and their structural and optical characterizations 729

B. R. BENNETT, B. V. SHANABROOK, R. J. WAGNER, J. L. DAVIS, J. R. WATERMAN and M. E. TWIGG: Interface composition control in InAs/GaSb superlattices 733

MATTHIAS ILG, ALBERT HEBERLE and KLAUS H. PLOOG: Lateral piezoelectric fields—a universal feature of strained III–V and II–VI semiconductor heterostructures 739

T. SAITO, Y. HASHIMOTO and T. IKOMA: Band discontinuity and effects of Si-insertion layer at (311)*A* GaAs/AlAs interface 743

M. A. TAGLIENTE, L. DE CARO, L. TAPFER, R. NÖTZEL, A.FISCHER and K. PLOOG: X-ray diffraction analysis of GaAs/AlAs multilayer structures grown by molecular beam epitaxy on (311) and (210) GaAs surfaces 747

J. SPITZER, Z. V. POPOVIĆ, T. RUF, M. CARDONA, R. NÖTZEL and K. PLOOG: Folded acoustic phonons in GaAs/AlAs superlattices grown on non-(100)-oriented surfaces ... 753

R. SCHORER, G. ABSTREITER, S. DE GIRONCOLI, E. MOLINARI, H. KIBBEL and E. KASPER: Vibrational properties of Si/Ge superlattices: theory and in-plane Raman scattering experiments 757

F. ROSSI, C. BUNGARO, L. ROTA, P. LUGLI and E. MOLINARI: Phonons and electron–phonon interaction in GaAs quantum wires 761

QUANTUM WELLS—ELECTRICAL PROPERTIES

F. SCHÄFFLER: Strained Si/SiGe heterostructures for device applications 765

B. VINTER, F. LUC, P. BOIS, L. THIBAUDEAU and E. ROSENCHER: Capture and emission of electrons in quantum wells under applied electric field 773

E. E. MENDEZ, J. NOCERA and W. I. WANG: Observation by spin-resolved resonant magnetotunneling of oscillatory Landé factor in two-dimensional electron systems..... 779

L. DÄWERITZ, C. MUGGELBERG, R. HEY, H. KOSTIAL and M. HÖRICKE: Wire-like incorporation of dopant atoms during MBE growth on vicinal GaAs(001) surfaces..... 783

R. BOGAERTS, A. DE KEYSER, F. HERLACH, F. M. PEETERS, F. DEROSA, C. J. PALMSTRØM, D. BREHMER and S. J. ALLEN JR: Size effects in the transport properties of thin $Sc_{1-x}Er_xAs$ epitaxial layers buried in GaAs 789

VERTICAL TRANSPORT—RESONANT TUNNELING

M. TEWORDT, V. J. LAW, J. T. NICHOLLS, L. MARTÍN-MORENO, D. A. RITCHIE, M. J. KELLY, M. PEPPER, J. E. F. FROST, R. NEWBURY and G. A. C. JONES: Single-electron tunneling and Coulomb charging effects in ultrasmall double-barrier heterostructures..... 793

H. BRUGGER, U. MEINERS, R. DINIZ, T. SUSKI, E. GORNIK, A. FÖRSTER and H. LÜTH: Hydrostatic pressure sensors based on solid state tunneling devices 801

C. H. YANG and R. A. WILSON: Realization of a novel resonant-tunneling hot-electron transistor: competition of ultrafast resonant-tunneling and energy relaxation 805

ATSUSHI TACKEUCHI, UWE STRAUß, WOLFGANG W. RÜHLE, TSUGUO INATA and SHUNICHI MUTO: Γ–X electron transfer in type II tunneling bi-quantum wells 809

E. L. IVCHENKO, A. A. KISELEV, Y. FU and M. WILLANDER: Valley mixing effects on electron tunneling transmission in GaAs/AlAs heterostructures 813

QUANTUM WELLS, SUPERLATTICES—OPTICAL PROPERTIES

S. FUKATSU: Luminescence investigation on strained $Si_{1-x}Ge_x$/Si modulated quantum wells..... 817

M. S. SKOLNICK, K. J. NASH, D. J. MOWBRAY, M. K. SAKER, T. A. FISHER, D. M. WHITTAKER, D. W. PEGGS, N. MIURA, S. SASAKI, R. S. SMITH and S. J. BASS: Fermi sea shake-up in quantum well luminescence spectra..... 825

R. J. WARBURTON, J. G. MICHELS, P. PEYLA, R. J. NICHOLAS and K. WOODBRIDGE: Optical investigation of superlattice orbits and impurity states in InGaAs/GaAs 831

H. T. GRAHN, F. AGULLÓ-RUEDA, A. D'INTINO, K. H. SCHMIDT, G. H. DÖHLER and K. PLOOG: Miniband formation in graded-gap superlattices 835

M. YAMAGUCHI, M. MORIFUJI, H. KUBO, K. TANIGUCHI, C. HAMAGUCHI, C. GMACHL and E. GORNIK: Stark-ladder transitions in GaAs/AlGaAs superlattices..... 839

O. KUHN, D. K. MAUDE, J. C. PORTAL, M. HENINI, L. EAVES, G. HILL and M. PATE: Modulated blue shift of the quantum well electroluminescence in a GaAs/AlAs superlattice resonant tunnelling device 843

TRANSPORT, OPTICS (Poster Session)

M. HOSODA, K. KAWASHIMA, K. TOMINAGA and K. FUJIWARA: A metastable state in self-electro-optic effect devices using Stark ladder transitions..... 847

R. FERREIRA and G. BASTARD: "Spin"-flip of holes in asymmetric quantum wells 851

R. FERREIRA, P. VOISIN and G. BASTARD: Interactions between Wannier–Stark states 857

I. TANAKA, M. NAKAYAMA, H. NISHIMURA, K. KAWASHIMA and K. FUJIWARA: Resonant coupling between buried single-quantum-well and Wannier–Stark-localization states in a GaAs/AlAs superlattice 863

F. J. RODRÍGUEZ and C. TEJEDOR: Fermi edge singularities in doped quantum wires and quantum wells 867
